

macproducts grey water

disposal system

01449675277

The unit is fully assembled. Step one - pull the bolts through the grey pipes and tighten the 2 nuts up to the filter - rotate the two pipes anti-clockwise so that they line up with your caravan waste outlet pipes, push the pipes into the outlets firmly, gently tap or push the bolts into the ground to secure unit.

Maintenance, remove one nut and bolt, pull off end cap, remove filter and wash in used dishwater ( this helps the bio system in the filter to keep working ) then tap it gently to dislodge any stuck particals , replace it into the housing, replace end cap, replace bolt and secure with nut. All parts are fully recycleable.

**AS THE FILTER IS A FINE MESH DO NOT PUT ANY FOOD WASTE DOWN THE SINK AS THIS WILL CAUSE THE FILTER TO BLOCK AND RESULT IN YOU HAVING TO CLEAN THE FILTER MUCH MORE OFTEN ALSO PLEASE DO NOT PUT COOKING FAT, OIL, SINK UNBLOCKER, BLEACH, OR ANY OTHER CAUSTIC CHEMICALS THAT MAY BE HARMFUL TO THE ENVIRONMENT THROUGH YOUR GREY WATER SYSTEM.**

THANK YOU FOR YOUR PURCHASE.
